

# wordpress 二次开发全能教程

## 1. 根据分类来制定导航条

A. 修改页面 header.php!

```
<div id="main-nav" class="col span-12">
    <ul>
        <?php wp_list_pages('&title_li='); ?>
        <?php wp_list_categories('title_li='); ?> //增加这一行
    </ul>
</div>
```

B. 修改 style.css, 增加下面一行语句

```
#main-nav li.cat-item{
    margin-right: 2.2em;
    float: left;
}
```

## 2. 删除控制面板首页多余的板块

A. 删除开发日志面板, 在 `wp-admin\includes\dashboard.php` 注释掉下面几句代码。

```
// Primary feed (Dev Blog) Widget

if ( !isset( $widget_options['dashboard_primary'] ) ) {
    $update = true;
    $widget_options['dashboard_primary'] = array(
        'link' => apply_filters( 'dashboard_primary_link',
__ ( 'http://wordpress.org/development/' ) ),
        'url' => apply_filters( 'dashboard_primary_feed',
__ ( 'http://wordpress.org/development/feed/' ) ),
        'title' => apply_filters( 'dashboard_primary_title', __ ( 'WordPress
Development Blog' ) ),
        'items' => 2,
        'show_summary' => 1,
        'show_author' => 0,
        'show_date' => 1
    );
}

wp_add_dashboard_widget(
    'dashboard_primary',
    $widget_options['dashboard_primary']['title'],
    'wp_dashboard_primary',
    'wp_dashboard_primary_control' );
```

B. 删除相关新闻，在 `wp-admin\includes\dashboard.php` 注释掉下面几句代码。

```
if ( !isset( $widget_options['dashboard_secondary'] ) ) {
    $update = true;
    $widget_options['dashboard_secondary'] = array(
        'link' => apply_filters( 'dashboard_secondary_link',
__ ( 'http://planet.wordpress.org/' ) ),
        'url' => apply_filters( 'dashboard_secondary_feed',
__ ( 'http://planet.wordpress.org/feed/' ) ),
        'title' => apply_filters( 'dashboard_secondary_title', __ ( 'Other
WordPress News' ) ),
        'items' => 5
    );
}
wp_add_dashboard_widget(                                'dashboard_secondary',
$widget_options['dashboard_secondary']['title'],        'wp_dashboard_secondary',
'wp_dashboard_secondary_control' );
```

C. 删除相关插件

```
if ( current_user_can( 'activate_plugins' ) )
    wp_add_dashboard_widget( 'dashboard_plugins', __ ( 'Plugins' ),
'wp_dashboard_plugins' );
```

D. 删除引用链接

```
// Incoming Links Widget
if ( !isset( $widget_options['dashboard_incoming_links'] )
|| !isset( $widget_options['dashboard_incoming_links']['home'] ) ||
$widget_options['dashboard_incoming_links']['home'] != get_option('home') ) {
    $update = true;
    $widget_options['dashboard_incoming_links'] = array(
        'home' => get_option('home'),
        'link' => apply_filters( 'dashboard_incoming_links_link',
'http://blogsearch.google.com/blogsearch?hl=en&scoring=d&partner=wordpress&q=li
nk:' . trailingslashit( get_option('home') ) ),
        'url' => apply_filters( 'dashboard_incoming_links_feed',
'http://blogsearch.google.com/blogsearch_feeds?hl=en&scoring=d&ie=utf-8&num=10&
output=rss&partner=wordpress&q=link:' . trailingslashit( get_option('home') ) ),
        'items' =>
isset($widget_options['dashboard_incoming_links']['items']) ?
$widget_options['dashboard_incoming_links']['items'] : 10,
        'show_date' =>
isset($widget_options['dashboard_incoming_links']['show_date']) ?
$widget_options['dashboard_incoming_links']['show_date'] : false
    );
}
```

```
wp_add_dashboard_widget( 'dashboard_incoming_links', __( 'Incoming Links' ),  
'wp_dashboard_incoming_links', 'wp_dashboard_incoming_links_control' );
```

#### E. 删除“更新到新版本”

```
update_right_now_message(); //287
```

### 3. 显示所有最新的文章

```
<?php  
$postslist = get_posts('numberposts=10&order=ASC&orderby=title');  
foreach ($postslist as $post) :  
    setup_postdata($post);  
?>  
<div>  
<?php the_date(); ?>  
<br />  
<?php the_title(); ?>  
<?php the_excerpt(); ?>  
</div>  
<?php endforeach; ?>
```

### 4. 发表文章时对文章进行修改的操作

```
<?php  
function filter_handler( $data , $postarr )  
{  
    // do something with the post data  
    return $data;  
}  
  
add_filter( 'wp_insert_post_data' , 'filter_handler' , '99' );  
?>
```
